Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, thanks to its exceptional level of product performance and their consistently high level of customer support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division based in Cleveland has a expert team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled forklifts as part of a national equipment expansion venture. Early sales of this industrial equipment focused on large business communities, the armed forces and on state-run corporations. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Home-based forklift trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of significant expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly lucrative for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting models they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
