

Aerial Work Platform

Aerial Work Platforms - There are lots of attachments designed for lift trucks that could be utilized to help expand the capabilities of your lift truck and allow you to carry items, handle materials with less effort or to accomplish clean-up tasks.

Several attachments were specifically meant for the forks themselves. For example, blade extensions are utilized whenever you need more fork length, that increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded attachments are another type utilized if moving rolled material in order to ensure it does not roll off of the typical flat blades.

Lifting attachments could be pivoting and telescoping crane accessories. They come in various kinds. These attachments are normally used for moving metal bars, poles, lumber or any kind of bulky objects. Other accessories like various kinds of hook plates and hooks are accessible to lift stuff utilizing a sling or chain. Slab lifters and magnetic filters are other items that could be used together with hook accessories. Slab lifters are specialized accessories that are meant for picking up various materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift to make moving rolls of carpet much easier. The attachment hooks onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are several types of forklift accessory utilized for facility maintenance like for instance snow blades. These industrial blades could be connected to front end loaders and utilized for transporting materials like for instance dirt, and mulch as well as snow. Other common cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the forklift blades hook onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up easy and quick.

Material spreaders are other attachments utilized on forklifts. These spreaders are helpful for a range of applications like spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which many businesses utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models obtainable that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the lift truck. Larger platform units have extra space for employees to be able to carry tools and other essential stuff for the job. Usually work platforms are constructed of steel or ploy material.
